

7 EASY STEPS TO AN EFFORTLESS EXPERIENCE

1

HELLO, I'D LIKE A QUOTE

We reply in 2 days to all inquiries. Tell us about your parts, provide essential information such as certs, approvals, shipping requirements, portals, serialization details. Don't forget to mention any special finishing, adhesives or revisions. The more info we have now, the fewer delays.

2

SURE, SEND A BLUEPRINT

The cornerstone of your order is the blueprint. It will drive the entire manufacturing process. Don't have a blueprint? No problem. Send us a sample and we will reverse engineer one for you. Using the blueprint's specifications, an artwork proof is sent to you for approval.

3

ESTIMATORS ESTIMATE

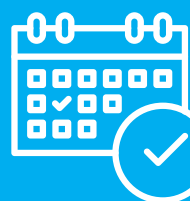

Our team of estimators take every specification included in your blueprint to determine the most efficient way to manufacture your part.

4

ACCEPT PRICE & SEND P.O.

Once you accept the pricing, you will be instructed to send a Purchase Order or P.O. that will restate the order including part information, materials used and shipping details.

5

ON THE SCHEDULE

Next, you will be sent a proof to approve. Once we receive that and your P.O., the order entry process begins and within 48 hours an acknowledgement email will be sent.

This will confirm that your order has been scheduled and your estimated ship date is provided to you.

Lead times vary depending on the products, processes and materials involved.

6

ONLINE PORTAL

Our online customer portal allows you to check that your order is open, closed or shipped at your convenience. Easy to use by entering your P.O. number, this will reduce the number of back-and-forth open order reports and give you the ease of mind that you have access to your order at any time.

7

FEEDBACK & REORDER

Your part has been fabricated with care and precision. It has been inspected, packaged and shipped to your specified location. We hope you are 100% satisfied with the finished parts. In fact, the next go around will be even easier now that we have you in our system and know about your company! You will have the opportunity to score us on your confirmation email. We look forward to your feedback!
